

### Taco Shell

Show:Feb 20th

---

Ingredients:Serves 1

Cooking Oil

1 Corn Tortilla

Salt to tast

**Procedure:**

Add 1/2 inch cooking oil to a skillet that has been heated to medium heat. Place the corn tortilla in and cook for about 1 minute, turn and cook on that side for another minute. Remove. Fold to shape, while it is still a bit soft. Return to the skillet in its half-moon shape and fry to a stiffer consistency. To keep it warm while making more, place in a 200°F oven.
